CARDIOVASCULAR SUPPORT PROGRAM

Your pet's heart is one of the most critical organs, continuously pumping to circulate oxygenated blood to every body cell. If disease interrupts your pet's normal heart function, their entire body can be compromised.

REDUCE INFLAMMATION

Consuming a balanced amount of Omega-6/**Omega-3 fatty acids** (also known as a lower Omega-6/Omega-3 ratio) can provide a number of health benefits.

The EPA and DHA help maintain cardiovascular health, promote healthy serum triglyceride levels, and enhance cognitive health. The DHA helps with proper brain function by influencing the neural membranes.

MUSHROOM SUPPLEMENTS

Breathe is our premium respiratory and cardiovascular-supporting mushroom formula. Our medicinal mushroom extracts are hot water tripled extracted from the fruiting bodies of fungi cultivated and wild-harvested in North America.

SUPPORT GUT FUNCTION

Health Starts In The Gut. The gut's microbiome (bacterial inhabitants) are the foundation of overall good body health. Help keep your dog's gut healthy in order to help reduce inflammation that can cause pain, stiffness and discomfort in the body.

WHOLE BODY SUPPORT

Glandular supplements can be a vital component of a fully balanced diet. Many essential nutrients cannot be obtained from plants and meats alone.

A high-quality gland-based multivitamin like **Holistic Total Body Support** can fill in all of the missing holes in your pet's diet, and support the endocrine system with essential raw materials to keep it working efficiently.

SUPPORT THE CARDIO

Taurine is essential for dogs because it prevents a variety of diseases and abnormalities. It can also help to regulate blood flow, improve brain health, promote heart health, and strengthen muscle functions.
