LIVER SUPPORT PROGRAM

Liver Enzyme elevation is rarely life-threatening, but it means at least 75% of the liver has been injured. Chronic liver disease can be debilitating, creating nausea, abdominal pain, and needless suffering. **The Liver Support Program** is designed to help improve the detoxification process, decrease inflammation, and improve liver function.

#1 DECREASE INFLAMMATION

TPEMF therapy works by directing small amounts of energy toward a specific part of your pet's body via a specialized magnetic device. This type of therapy has been used to treat acute and chronic pain. It also helps reduce inflammation.

Omega-3 fatty acids have anti-inflammatory properties. Supplementation of high omega-3 fatty acids can help support dogs and cats with chronic kidney disease by reducing protein loss in the urine (proteinuria), reducing hypertension at the level of the kidney, and decreasing inflammatory changes within renal tissues.

Free and Easy Wanderer is the classic formula to help support the Liver in Traditional Chinese Medicine. It helps to course the Liver, reducing irascibility, and smoothing the flow of Qi and Blood in the body. That translates to improving irritability and anxiety, as well as detoxification and support of the digestive process.
