VACCINE, HEARTWORM & DETOX PROGRAM

I believe minimal vaccination is an important part of pet health, and it is important to help prevent potential vaccine reactions.

PREVENTIVE MEDICINE

Protecting your pet from vaccine reactions is simple if you have Thuja on hand. Likewise, heartworm prevention prevents many dog deaths every year, but be sensible about what your pet's exposure risk is.

If you need prevention, use the simplest oral medication with the least number of ingredients, Like Heartgard or its generics.

Helping the liver clean out prevents many of the side effects, and supports your pet's liver.

Thuja is used by homeopathy as a master detoxifier.

Here, I recommend using the mother tincture to prevent vaccine reactions.

Shake Well. Give 1 drop per 10 pounds of body weight 2 times daily for 5 days after vaccinations.
