

RESPIRATORY SUPPORT PROGRAM

PREVENTIVE MEDICINE

70% of the immune system is in the gut. The normal microbiome has been destroyed if your pet has taken antibiotics, steroids, or other potent anti-allergy meds. Your pet needs immune-boosting supplements to help them fight the infection.

SUPPORT GUT FUNCTION

Health Starts In The Gut.

The gut's microbiome (bacterial inhabitants) can have a direct effect on the nervous system and can therefore contribute to behavioral issues.

Dogs given probiotic supplements can respond better to external stressors and are generally able to maintain a more positive emotional state.

(for pets with beef allergy)

WHOLE BODY SUPPORT

Glandular supplements can be a vital component of a fully balanced diet. Many essential nutrients cannot be obtained from plants and meats alone.

A high-quality gland-based multivitamin can fill in all of the missing holes in your pet's diet, and support the endocrine system with essential raw materials to keep it working efficiently.

MUSHROOM SUPPLEMENTS

Breathe is our premium respiratory and cardiovascular-supporting mushroom formula. Our medicinal mushroom extracts are hot water tripled extracted from the fruiting bodies of fungi cultivated and wild-harvested in North America.

REDUCE INFLAMMATION

Consuming a balanced amount of Omega-6/Omega-3 fatty acids (also known as a lower Omega-6/Omega-3 ratio) can provide a number of health benefits.

The EPA and DHA help maintain cardiovascular health, promote healthy serum triglyceride levels, and enhance cognitive health. The DHA helps with proper brain function by influencing the neural membranes.
